

# SYSC 3303 ELEVATOR PROJECT

## Iteration #2

### Group #3

For this iteration, we were able to contact Qihang Peng, allowing us to divide the work among everyone this time. We split up the work as follows:

Imran: Fixing iteration 1 (Getting the program running), Starting the scheduler state machine, the state machine diagrams and other diagrams.

Sukhrobjon: Fixing iteration 1 (Getting the program running), Starting the scheduler state machine. Fixing the floor subsystem run method, and diagrams.

Duabo: Finished the scheduler state machines

Ismael: Helped with every task, the readMe, JavaDoc.

Qihang: Started and finished the elevator state machine.
