SYSC 3303 ELEVATOR PROJECT

Iteration #1

Group #3

We broke down the work initially between myself, Imran Latif, and Sukhrobjon Eshmirzaev. I chose to start preparations on the elevator subsystem and he chose to start preparations for the floor subsystem. After the professor rearranged the groups, we split up the work as follows:

Imran: Floater between subsystems, testing and Diagrams

Sukhrobjon: Floor Subsystem and testing

Duabo Dagogo Longjohn: Scheduler subsystem, testing and ReadME file

Ismael Mfumu: Elevator subsystem

Qihang Peng: We could never establish contact through email, and he never showed up in lectures or in labs. We sent multiple emails and while we heard replies from the others, He never responded.
